London Wool Auction.

London Wool Auction.

London, May & The offerings at the wool auction sales today numbered 13.25 bales. There was a large attendance. Bidding was animated throughout the sale. Victoria greasy combings were in strong demand and several lots were taken by Americans, who also purchased some greasy halfbrods at full rates. Queensland greasy was very strong, and combings were in exceptionally keen demand. Fine greasy Cape of Good Hope sold well, and low grades were occasionally withdrawn, bids being ijd below holders limits. Scoureds were firm and unchanged.

Grain and Provisions

CHICAGO, May 6.—The Obio crop report was perhaps the chief factor in causing a strong wheat market today. At the close the price of July wheat showed a gain of 150 to. Corn is down 140 to. Corn is d

## **Business World Conditions Better**

Improvement in Temperature Came Too Late to Recover Large Part of Injury to Spring Trade.

EW YORK, May 6.-R. G. Dun & Co.'s weekly review of trade tomorrow will say: "Somewhat better retall distribution has followed improvement in temperature, but it came too late to recover any large part of the tardy season's injury to spring trade-Quiet conditions are noted in practically

Quiet conditions are noted in practically all lines of wearing apparet. Operations for future requirements are carried on with caution, and this disposition to avoid excessive commitments will do much to reduce the number of failures. Some improvements in collections, particularly at the South and West will also strengthen weak concerns.

The percentage of idle factories has increased, especially in textiles and footwear, and a change in style has rendered unavailable much silk machinery. Structural work is increasing, but dealers had accumulated large supplies of building materials, and prices lack seasonable firmness. Commodity prices declined slightly during April. Railway earnings in April were 5.3 per cent less than last year.

"Recovery in iron and steel industries is again retarded by the unexpected dissolution of the ore association.

"After last week's exceptionally heavy transactions it was natural that the Westfransactions it was natural that the West-ern hide markets should become inactive Prices remain firm, however. "Commercial failures this week in the United States are 256, against 322 last week, 241 the preceding week and 175 the corresponding week last year. Failures in Canada number 27, against 16 last week, 12 the preceding week and 22 last year."

### WHAT BRADSTREET SAYS AS TO OUTLOOK

NEW YORK, May 6.-Bradstreet's to morrow will say: "Long-expected good weather has at last materialized and has helped farmers and retail trade in seasonable goods. Crop preparations and planting have made especially good progress, the present outlook being that while the winter wheat crop will be short, the acroage in spring wheat, oats and corn will be heavily increased. Rotall and wholesale trade, however, have not experienced the stimulation earlier looked for, there being a disposition so far to regard results as below expectations. Re-order trade with jobbers is slow and fall orders are backward. Other conditions partake of irregularity. Copper tends downward on enlarged production and less eager demand.

on charged production and less cager-demand.

"Wheat, including flour, exports for the week ending May 5 aggregate 1,192,718 bushels, against 1,019,990 bushels last week, 2,201,690 this week last year, 3,202,246 in 1982 and 4,178,872 in 1991. From July 1, 1903, to date they aggregate 122,899,835 bushels, against 190,685,185 last season, 214,641,639 in 1902 and 176,922,141 in 1901.

"Corn exports for the week aggregate (23,461 bushels, against 190,193 last week, 1,631,709 a year ago, 126,785 in 1902 and 1,582,831 in 1901. From July 1, 1902 to date they aggregate 49,476,021 bushels, against 56,944,-069 last season, 24,161,407 in 1902, and 154,-668,974 in 1901.

#### SEASONABLE WEATHER CAUSES REVIVAL IN TRADE

vices from important commercial centers to the International Mercantile agency show that better trade, incident to more seasonable weather, has been reflected this week in a revival of bususual May volume. This is peculiarly so of clothing in the Northwest, which shows results ahead of 1963. In months shows results ahead of 1903. In sections where low temperature continues, dry goods are quiet with notable falling off "filling in" orders, usual at this season. Spring is still a month behind in some regions, although reports from many centers indicate general improve-

ment over a wek ago.

Chicago reports some decline in building operations, due largely to high prices for materials and difficulty in securing supplies. Outlook in other dissecuring supplies. Outlook in other dis-tricts is satisfactory, with collections excellent, and most branches or hard-ware showing decided improvement. Jobbers report good fall orders and some increase in spring business. The influx of exposition visitors to St. Louis has stimulated trade in that vicinity Tobacco is active at the South, under the influence of boom prices, from which the producer has thus far derived small benefit. The textile indus-try is still depressed. General distribution of merchandise has been acceler

ated in most branches during the week. Crop news from the Northwest is satisfactory. While the seeding has been late in some sections, improved weath-er conditions have favored the work so that it is now in full blast in territory where it had been specially retarded. High prices for wheat have stimulated acreage, so that the farmers are un usually active. Conditions this week have been specially favorable for growing crops in Kansas, Missouri, Illinois, Oklahoma and Iowa. Conditions of growing winter wheat and oats show marked improvement. Warmer weathwith slight precipitation, accounts for the better results.

Bank Clearings.

NEW YORK, May 6.—The following ta-ble, complied by Bradstreet, shows the bank clearings at the principal cities for the week ended May 5, 1994, with the per-centage of increase and decrease as com-pared with the corresponding week last vear:

### FLOUR TAKES A TEN CENT DROP

Lower Freight Rate Brings a Slight Relief-Egg Plant Comes

NTICIPATED for some weeks past, on account of a better freight rate on northern, a drop in flour went into effect on the local market yesterday. The reduction is only 10 cents per slight relief will be appreciated by the

heavily taxed consumer.

Fish trade was lively yesterday. Saimon became rather scarce, but other staple varieties were on hand in attractive quality and condition. The demand for poultry is good and Eastern shipments are received regularly.

Among the new arrivals yesterday were fresh invoices of Wenningsted cabbages, resulting in a reduction of the wholesale prices to 14 a hundred. Egg plant is now on the market regularly at 12½ cents a pound.

however, to a prependerance of bullish crop advices, the first one of which was the Ohio crop report. Statistics in regard to the condition of winter wheat in that State showed marked deterioration, the figures being 53, compared with 67 last month. Shorts and commission houses became active buyers and the market soon developed decided strength. Some impetus was given the upward trend by the strength of the Northwestern markets, notwithstanding the shutdown of the flour mills at Minneapolis. A general report on the condition of the winter crop issued by a well-known Chicago authority was decidedly buillish. According to this expert a heavy falling off in winter wheat conditions was manifested in all stages east of the Mississippi river and north of the Ohio. Some States were said to show a decline of 10 to 15 points. The loss in the Ohio valley, it was cialmed, was the heaviest in many years. A partial confirmation of these figures was given in a report from St. Louis by another crop statistician. Under this superabundance of adverse news the market continued to gain in strength until late in the session. During the last half hour realizing sales checked the advancing tendency and caused a slight reaction in prices, but the market closed strong. After selling up to 85%c. July closed at 884,20%c. Clearances of wheat and flour were equal to 1,21,000 bushels. Primary receipts were 142,000 bushels. Primary receipts were 142,000 bushels. Compared with 208,000 bushels a year ago.

During the early part of the session shorts were active purchasers of corn, and in consequence the market ruled strong. The market closed near the low point. July opened a shade to ic lower at 18% to 5%,048%; and 160sed at 48%c. Local receipts were 211 cars, with 22 of contract grade.

In sympathy with other grains, oats were strong early in the day. After open-

ceipts were 211 cars, with 22 of contract grade.

In sympathy with other grains, cats were strong early in the day. After opening ½ to ½c higher at 25½c, July ranged between 25% to 35½c, and closed at 35½c. Local receipts were 68 cars.

Heavy selling by packers and outside interests caused weakness in provisions. The market was firm early in sympathy with higher prices for hogs at the yards and on the strong grain markets, but sentiment soon changed, the market becoming weak on poor support. At the close July pork was down 22½c at \$11.67½. July lard closed
